Indicator Operations

Power Scale
1. Press the power switch to turn the indicator on or off (see Figure 1).

Enter Shrink
Shrink value is applied to the gross weight and is limited to 0.00-100.00 percent.

2. Press [Shrink %] any time to change the shrink percentage.

Enter Head Count
1. Insert ticket into the printer. Press FORWARD on the printer to secure the paper.
2. Verify the scale is level. If not, it will blank the weigh display and go to a screen showing the current pitch and roll.
3. Press [ZERO] to re-zero scale if required.
4. Load animals onto scale.
5. Press [Weigh Animals].
6. The indicator will prompt *Enter Head Count*. Using keypad, enter the number of animals and press [enter]. Once the scale is stable, head count, total weight and average weight per head will be displayed and ticket will begin to print and advance.
   - Last weighment - Information for the previous group of animals on the scale.
   - Current Weighment - Number of animals currently on the scale, their total weight and the average weight per animal.
   - Totals - Total of all animals weighed in the current weigh batch and their average weight.
7. Unload the scale.
8. Follow steps 4-7 until all animals from the current batch have been weighed.
9. Press [Batch Complete] to complete current batch of animals.
   Summary information will be printed on the ticket and the ticket will be released.
10. Press [Reprint] any time prior to starting the next batch to reprint the last ticket.

Softkey Operations

Weigh Animals
Press to begin weighing animals.
Press each time a new group of animals is placed on scale, when a batch is in process.

Shrink
Allows input of a shrinkage value when weighing animals.
